

LIPAN-KICKAPOO WATER CONSERVATION DISTRICT

8934 Loop 570
San Angelo, TX 76905
Ph: 325-651-0919

DECLARATION OF PRODUCTION WELL

I, _____, _____
Landowner Address

do hereby certify to the LIPAN-KICKAPOO WCD that in compliance with the District Rules and pursuant to the requirements of Permit No. _____ dated _____,

I intend to produce the Newly Drilled Well Existing Well No: _____.

I understand that under the rules of the District the location of the old well (the well being replaced) shall be protected in accordance with the spacing rules of the District until the replacement well is drilled and tested. I further understand that either the landowner or his agent must within 4 months of the issuance of the permit declare in writing to the District which one of these two wells he desires to produce. If the landowner does not notify the District of his choice within this period, then it will be conclusively presumed that the new well is the well he desires to retain. **Within 30 days after the expiration of the permit or extension date thereof** and the determination of which well will be retained for production:

- (1) if the tract of land is drilled to density, the well that is not to be produced shall be abandoned and plugged and a properly completed Plugging Report shall be submitted to the District;
- (2) If the tract of land is not drilled to density, the old permitted well shall be either:
 - (a) Abandoned and plugged; or
 - (b) If it meets the spacing requirements of the District, it may be properly equipped in such a manner that it cannot produce more than 25,000 gallons of water a day and used solely for domestic or livestock use; or
 - (c) Closed in accordance with Article 9202, Vernon's Annotated Civil Statutes Texas Health and Safety Code §756.01 et seq., as amended.
- (3) During the 4 month testing period, either the old well or the new well may be operated but not both.

I understand that failure to both abide by the Rules of the District concerning the plugging of these wells and to submit the Plugging Report to the District within 30 days following the permit expiration date is a violation of the law and/or the rules of the District and subjects the land owner to legal action by the District. A violation occurs the first day after the 30 day period ends and continues each day thereafter until appropriate action is taken to either plug the wells or bring them into compliance with District Rules.

Signature of Owner/Agent

Date

Field Inspection has been performed and the owner

is is not in compliance with District Rules.
